* Chromascop®

The Chromascop shade guide is an instrument for the shade selection of various Ivoclar Vivadent products shaded according to the Chromascop shade system. The 20 shades are divided into five clearly arranged, removable shade groups.

Advantages:

- Easy handling
- Logical, chromatic arrangement of shades
- Disinfectable

Delivery form

Chromascop Shade Guide	1x	529479
------------------------	----	--------

* A–D Shade Guide with Bleach Shades

The A-D Shade Guide is an instrument for the selection of tooth shades according to the A–D and Bleach BL shade system.

The 16 basic shades in the shade groups A, B, C and D, supplemented by the 4 modern Bleach shades BL 1 to BL 4, are practical to use and represent the ideal tool for dentists and dental technicians.

Advantages:

- 16 A–D shades
- 4 Bleach shades
- Common shade standard for Ivoclar Vivadent products
- Sterilizable
- Autoclavable

Delivery form

A–D Shade Guide		
Complete (16 and 4 shades)	1x	628587
Complete with name embossing	1x	637531

BOND

FILL

Isolation

OptraGate®

The gentle solution for a better view

Advantages:

- Efficient treatment and easier relative isolation
- Enlarged operating field and easy access to cavity
- Increased comfort for patients
- Attractive colours for enhanced patient compliance among children

Further products:

- OptraDam® Plus

Adhesives

Adhese® Universal

Universal adhesion with advanced delivery

Advantages:

- Efficient delivery – up to 190 single-tooth applications per 2 ml VivaPen®
- Universal application – for all bonding and etching techniques
- Predictable results – high bond strength on wet & dry dentin and enamel
- Desensitizing effect - integrated protection against hypersensitivity

Further products:

- Total Etch
- Syntac®
- Excite® F
- Excite® F DSC

Flowable Composites

Sculptable Composites

Tetric EvoFlow® Bulk Fill/ Tetric EvoCeram® Bulk Fill

The highly efficient posterior composite!

Advantages:

- Increment thicknesses of up to 4 mm due to the highly reactive light initiator Ivocerin®
- Dentin- or enamel-like volume replacement
- 10 seconds ($\geq 1,000$ mW/cm²)
- 47% less time required than with the conventional technique*

Further products:

- Tetric EvoCeram®
- Tetric EvoFlow®
- IPS Empress® Direct
- Tetric®

* compared to Tetric EvoFlow® and Tetric EvoCeram®. Data available on request.

Care Products

OptraSculpt®

Efficient contouring due to non-stick surface

Advantages:

- Efficient, easy contouring in the anterior and posterior region due to specially adjusted attachment shapes
- Homogeneous surface texture

Bluephase® Style

The smallest LED for every use

Advantages:

- Every hand – comfortable to hold for men and women
- Every material – universal use due to Polywave® LED with broadband spectrum
- Every time – optional corded operation due to Click & Cure

OptraPol®

Simply brilliant – in just one step

Advantages:

- Smooth surface finish and perfect lustre due to high content of diamond particles
- Quick high-gloss polishing in only one working step
- Multiple use for greater cost-efficiency

Fluor Protector S

Homogeneous protective varnish in a dispensing tube

Advantages:

- Immediate fluoridation of enamel
- High-yielding fluoride depot
- Mild taste

Further products:

- OptraSculpt®

Tetric EvoFlow® Bulk Fill

ivoclar
vivadent®
passion vision innovation

Tetric Evo-Line

One solution for all cavity classes

The Tetric Evo line of products combines clinical reliability and durability with innovation. The four composites of the Tetric Evo family provide high-quality esthetic restorations for all cavity classes. Gains in efficiency can be achieved by using the correct combination of composites, depending on the specific cavity class.

All four composites are now offered together in new system kits, which include an overview of their indications and possibilities of combination to enable users to see which material is best used when and where.

Each system kit comprises:

- Tetric EvoCeram – sculptable, for conventional layering techniques
- Tetric EvoFlow – flowable, for conventional layering techniques
- Tetric EvoCeram Bulk Fill – sculptable, application in increments of up to 4 mm
- Tetric EvoFlow Bulk Fill – flowable, application in increments of up to 4 mm
- Adhese® Universal VivaPen – the universal adhesive system

The kits are available in Cavifils or syringes.

Delivery form

Syringes

Tetric Evo-Line System Kit syringe 686707

4 syringes, 3 g each (1x A2, A3, A2 Dentin Tetric EvoCeram, 1x "A Tetric EvoCeram Bulk Fill)
2 Luerlock syringes, 2 g each (1x A3 Tetric EvoFlow, 1x "A Tetric EvoFlow Bulk Fill)
1 VivaPen Adhese Universal, 2 ml each
var. accessories

Empty: Tetric Evo-Line System Kit syringe 688776

Packaging materials only, without Instructions for Use, without materials, without accessories

Cavifils

Tetric Evo-Line System Kit Cavifil 686718

55 Cavifils, 0.2 g each (10 x "A Tetric EvoCeram Bulk Fill, 10 x "A Tetric EvoFlow Bulk Fill, 10 x A2, A3 Tetric EvoCeram, 5 x A2 Dentin Tetric EvoCeram, 10 x A3 Tetric EvoFlow)
1 VivaPen Adhese Universal, 2 ml each
var. accessories

Empty: Tetric Evo-Line System Kit Cavifil 688777

Packaging materials only, without Instructions for Use, without materials, without accessories

Insert with recommendations included

Tetric EvoFlow® Bulk Fill

Flowable and highly efficient 4-mm bulk-fill composite suitable as a first volume layer in Class I and II restorations.

Indications:

- As a first layer / first increment in composite restorations of Class I and II in permanent teeth
- Restoration of deciduous teeth

Tetric EvoFlow® Bulk Fill restorations are capped with e.g. Tetric EvoCeram® Bulk Fill.

Advantages:

- Dentin-like volume replacement material that can be placed in increments of up to 4 mm due to the highly reactive light initiator Ivocerin® and Aessencio technology
- Maximum esthetic results, especially in cases with dentin discolouration
- Short curing time of 10 seconds ($\geq 1,000 \text{ mW/cm}^2$)
- Up to 47% savings in time compared to conventional composites*
- Optimum marginal quality due to low shrinkage and low shrinkage stress
- Excellent affinity to cavity walls and self-levelling properties
- Based on the proven sculptable volume replacement composite Tetric EvoCeram Bulk Fill

*compared to Tetric EvoFlow and Tetric EvoCeram. Data is available upon request.

Shades:

Three universal shades which demonstrate dentin-like translucency:

- ^{IV}A: Universal A shade
- ^{IV}B: Universal B shade
- ^{IV}W: White shade for deciduous teeth or light-coloured permanent teeth

Delivery form

Application tips ø 1.2 mm (black)	1 x 20	669838

Tetric EvoCeram® Bulk Fill

Sculptable and highly efficient 4-mm bulk-fill composite for the posterior region.

Indications:

- Restoration of deciduous teeth
- Restoration of posterior teeth (Classes I and II, including reconstruction of individual cusps)
- Class V restorations (cervical caries, root erosion, wedge-shaped defects)
- Reconstructive build-up
- Extended fissure sealing in molars and premolars

Advantages:

- Enamel-like volume replacement material that can be placed in increments of up to 4 mm due to the highly reactive light initiator Ivocerin®
- Short curing time of 10 seconds ($\geq 1,000$ mW/cm²)
- Up to 47% savings in time compared to conventional composites*
- Optimum marginal quality due to low shrinkage and low shrinkage stress
- Long working and modelling time under operator or ambient light
- Convenient handling, non-slump consistency and optimum adaptation to cavity walls.
- Based on the universal composite Tetric EvoCeram®, which has been proven a million times over

*compared to Tetric EvoFlow and Tetric EvoCeram. Data is available upon request.

Shades:

Three universal shades which demonstrate enamel-like translucency:

- [®]A: Universal A shade
- [®]B: Universal B shade
- [®]W: White shade for deciduous teeth or light-coloured permanent teeth

Tetric EvoFlow®

Flowable, light-curing, radiopaque composite for direct restorative therapy and the cementation of ceramic and composite restorations.

Indications:

- Initial layer of Class I to V restorations
- Anterior restorations (Class III and IV)
- Class V restorations (cervical caries, root erosion, wedge-shaped defects)
- Small restorations of all types
- Extended fissure sealing
- Splinting of mobile teeth
- Blocking out of undercuts
- Adhesive cementation of translucent indirect composite or ceramic restorations
- Repair of composite and ceramic veneers

Advantages:

- Flowable when desired, stable as required due to the Viscosity Controller
- Ideal consistency for all composite indications
- Top-selling flowable in Europe
- Radiopacity unmatched by any other flowable composite
- 0.9-mm tip for precision application even in hard-to-reach cavities

Shades:

Dentin shades: A2, A3.5, B2

Enamel shades: A1, A2, A3, A3.5, A4, B1, B3

Highly translucent Incisal shade: T

Bleach shades: Bleach XL, Bleach L, Bleach M

Tetric EvoCeram®

Light-curing, universal composite for high-end standard restorations in the anterior and posterior region.

Indications:

- Restorations of deciduous teeth
- Restorations in the posterior region (Classes I and II)
- Anterior restorations (Classes III, IV)
- Class V restorations (cervical caries, root erosion, wedge-shaped defects)
- Veneering of discoloured anterior teeth
- Splinting of mobile teeth
- Extended fissure sealing in molars and premolars
- Repair of composite and ceramic veneers
- Build-ups for transparent, removable Invisalign® orthodontic retainers

Advantages:

- Universal composite for anterior and posterior restorations
- Proven clinical performance with over 100 million restorations placed worldwide
- More working time due to the patented light sensitivity filter
- Natural shade blend with surrounding dentition ensures outstanding restorative results

Shades:

Dentin shades: A2, A3.5, A4, B2

Enamel shades: A1, A2, A3, A3.5, A4, B1, B2, B3, C1, C2, C3, D2, D3

Highly translucent incisal shade: T

Bleach shades: Bleach XL, Bleach L, Bleach M, Bleach I

The only Direct Composite that can be called Empress®

Confidence

Reliability

Esthetics

The esthetics of ceramic with the convenience of composite.

- Exceptional Handling
- Simplified Application
- True-To-Nature™ Shades
- Superior Polish

Empress® Direct

Direct Esthetic Composite

IPS Empress® Direct

Light-curing composite for the direct highly esthetic restorative procedures.

Indications:

- Anterior restorations (Class III and IV)
- Posterior restorations (Class I, II)
- Cervical restorations (Class V, e.g. cervical caries, root erosion, wedge-shaped defects)
- Adjustment of tooth position and shape (e.g. diastema closure, closure of interdental “black triangles”, lengthening of the incisal edge)
- Direct veneers

Advantages:

- Wide range of indications for anterior and posterior teeth
- Wide range of shades in various degrees of translucency
- Not bound to one given layering technique
- Good polishing properties and high surface lustre
- Lifelike fluorescence
- Low sensitivity to light
- Outstanding radiopacity
- Compatible with Tetric EvoFlow® and IPS Empress® Direct Color
- The shade guide of the system is autoclavable and made of ceramic: the shade guide retains its precision over many years as the shade samples do not fade if they are exposed to light

Shades:

Dentin shades:

A1, A2, A3, A3.5, A4, IVA5, IVA6, B1, B2, C3, D2, Bleach L, Bleach XL

Enamel shades:

IPS Empress® Direct Flow

IPS Empress® Direct Flow is a light-curing flowable nano-hybrid composite available in three effect shades. This composite is used for the creation of highly esthetic restorations in the anterior region.

Indications:

- For creating lifelike esthetic effects in the incisal third
- Anterior restorations (Classes III, IV)
- Small restorations of all types
- Repair of composite/ceramic veneers

Advantages:

- Ideal addition to the IPS Empress Direct range of materials for the creation of special effects
- Unique Trans Opal Flow shade for a lifelike esthetic opalescence
- Lifelike translucency for the optimum reproduction of the incisal area
- Optimum surface affinity while ensuring stability
- Ideal consistency for contouring with the brush
- Excellent polishability

Shades:

Trans Opal, Trans 30, Bleach XL

Tetric®

Light-curing, universal microhybrid composite with a special filler composition. Available in syringes and cavifils.

Indications:

- Anterior and posterior restorations

Advantages:

- Excellent working properties
- Does not stick to the instrument
- Optimum modelling properties
- High abrasion resistance
- Very high radiopacity
- Fluoride release
- Natural shade effect (3 degrees of translucency and 10 shades available)
- Stability of shade

Shades:

Universal shades: A1, A2, A3, A3.5, A4, B2, B3

Highly translucent enamel shade: T

Dentin shade: A3.5 Dentin

Shade Guide	1x	612524

Heliomolar®

Light-curing universal microfilled composite in syringes and Cavifils.

Indications:

- Anterior and posterior restorations

Advantages:

- Easy direct application by means of Cavifils and the corresponding Injector
- Polishable to a high gloss; stable shade
- Excellent marginal adaptation and durable marginal seal
- High stability of shape and durable contact points
- High radiopacity and continuous fluoride release
- Excellent abrasion resistance

Shades:

105/–, 110/A1, 110T/A1T, 140/A2, 210/A3, 410/D3, 420T/–, 510/C3

Delivery form

Syringes

Refill	1 x 3 g	See p. 15
1 Syringe, 3 g each (8 shades)		

Cavifils

Refill	20 x 0.25 g	See p. 15
20 Cavifils, 0.25 g each (8 shades)		
Shade Guide	1x	550577

Heliomolar® HB

Fast, light-curing, high-viscosity, micro-filled composite material based on mouldable ceramics technology in syringes and Cavifils.

before

after

Indications:

- Restorations in the posterior region (Classes I and II, also occlusion-bearing)
- Restorations in deciduous dentitions

Advantages:

- Easy handling characteristics thanks to high viscosity
- Simplified creation of proximal contact areas
- High abrasion resistance
- High radiopacity (265% Al)
- Good polishing
- Low shrinkage
- Available in syringes or specifically designed Cavifils

Shades:

110/A1, 140/A2, 210/A3, B1, 420T/GE, TW

Delivery form

Syringes

Refill	1 x 3 g	See p. 15
1 Syringe, 3 g each (6 shades)		

Cavifils

Refill	20 x 0.25 g	See p. 15
20 Cavifils, 0.25 g each (6 shades)		

Heliomolar® Flow

Light-curing flowable microfilled composite in syringes.

Indications:

- Cervical restorations
- Anterior restorations
- Small restorations in the posterior region
- Extended fissure sealing in molars and premolars
- Repair of composite and ceramic veneers
- Blocking out of undercuts
- Adhesive cementation of indirect composite or ceramic restorations
- Splinting of mobile teeth
- As initial layer under Class I and II restorations
- Finishing layer on viscous composite material

Advantages:

- Convenient syringes containing 1.6 g of material
- Very thin, pre-bent metal cannulas
- Easy access to mini-cavities
- Bubble-free direct application
- Accurate, economical application

Shades:

105/–, 110/A1, 140/A2, 210/A3, 410/D3, 420T/–

Delivery form

Refill	1 x 1.6 g	See p. 15
1 Syringe, 1.6 g each (6 shades)		

IPS Empress® Direct Color

For true-to-nature characterization.

Indications:

- Individual characterization of direct and lab-fabricated composite restorations
- Masking of discoloured tooth structure
- Characterization of CAD/CAM veneers fabricated chairside

Advantages:

- True-to-nature characterization of high-end composite and CAD/CAM-fabricated restorations
- User-friendly direct application without dilution
- High masking capability even when applied in thin layers
- Smooth consistency
- 0.4-mm tips for precise application
- The ideal complement to IPS Empress® Direct and IPS Empress CAD

Shades:

white, honey yellow, ochre, brown, violet, blue, grey

Delivery form

Syringes

Assortment	637898AN
IPS Empress Direct Color	7 x 1 g each
Shades: white, honey yellow, ochre, brown, violet, blue, grey	
IPS Empress Direct Opaque	1 x 1.8 g
var. accessories	

Refill	1 x 1 g	Possible applications	
white		<ul style="list-style-type: none"> • Imitating enamel stains • Simulating halo effects • Accentuating cusps and ridges 	637899

violet		<ul style="list-style-type: none"> • Imitating opalescent areas 	637902
grey			637905
brown		<ul style="list-style-type: none"> • Imitating discoloured fissures, pits and enamel cracks 	637904

Application tips ø 0.4 mm (black)	1 x 20	634847
-----------------------------------	--------	--------

IPS Empress® Direct Opaque

IPS Empress Direct Opaque is a light-curing opaquing material suitable for masking exposed metal surface and discoloured tooth structure.

Indications:

- Masking of
- exposed metal surfaces when repairing damaged ceramic or composite veneers intraorally
 - discoloured tooth structure

Advantages:

- High masking capability even when applied in thin layers
- Universal opaque shade, no shade matching required

Shade:

opaque

Compoglass® F

Light-curing, compomer-based restorative material in Cavifils.

Indications:

- Restorations in deciduous teeth
- Class III and V restorations
- Intermediate restorations

Advantages:

- Application without phosphoric acid etching possible
- High fluoride release
- Easy direct application by means of Cavifils and the corresponding Injector
- Excellent esthetic properties
- Easy contouring and polishing
- No rubber dam required

Shades:

105/–, 110/A1, 140/A2, 210/A3, 230/A3.5, 340/A4

Delivery form

Refill	20 x 0.25 g	See p. 15
20 Cavifils, 0.25 g each (6 shades)		

Compoglass® Flow

Light-curing, flowable compomer-based restorative material in Cavifils.

Indications:

- Restorations in deciduous teeth
- Class III and V restorations
- Intermediate restorations

Advantages:

- Ease of handling
- High fluoride release
- Reliable self-adaptation
- No material flowing away
- No trapping of air
- Excellent marginal seal
- Accurate direct application technique

Shades:

140/A2, 210/A3

Delivery form

Refill	20 x 0.25 g	See p. 15
20 Cavifils, 0.25 g each (2 shades)		

Vivaglass® Liner

Light-curing glass ionomer cement for bases/liners.

Advantages:

- Continuous fluoride release
- Good dentin adhesion
- Outstanding radiopacity
- Light-curing, thus easy to process

Delivery form

Intro Pack	1 x 10 g / 1 x 8 g	536452

passion vision innovation

Adhese® Universal

The universal adhesive

Adhese® Universal is a single-component, light-cured adhesive for direct and indirect bonding procedures that features compatibility with all etching techniques: self-etch, selective-enamel-etch and total-etch. Adhese Universal is available in the unique VivaPen® delivery for fast and convenient direct intra-oral application with minimal waste to optimize cost-effectiveness.

Indications:

- Direct-placed light-curing composite and compomer restorations.
- Core build-ups with light-, self- and dual-curing composites.
- Adhesive cementation of indirect restorations with light- and dual-curing luting composites.
- Intraoral repair of fractured composite and compomer restorations.
- Desensitization of hypersensitive cervical areas.
- Sealing of prepared tooth surfaces before temporary/permanent cementation of indirect restorations.

Advantages:

- Efficient delivery – up to 190 single-tooth applications per 2 ml VivaPen*
- Universal application – for all bonding and etching techniques
- Predictable results – high bond strength on wet & dry dentin and enamel
- Desensitizing effect - integrated protection against hypersensitivity

* Data available upon request

Excite® F

Excite® F is a light-curing, fluoride-releasing single-component adhesive that is suitable for the total-etch technique.

Indications:

- Direct light- and dual-cure composite and compomer restorations
- Adhesive luting of indirect restorations involving light-curing

Advantages:

- Convenient and economical application with the VivaPen
- Also available in bottles and single dose vessels
- High adhesion values on enamel and dentin
- Acetone-free (alcohol-based solvent)
- Fluoride release
- Reduced post-operative sensitivity
- Storage at room temperature

Delivery form

Refill Single Dose	50 x 0.1 g	630377

Excite® F DSC

Excite® F DSC is a dual-cure, fluoride-releasing enamel and dentin adhesive that is suitable for the total-etch technique.

Indications:

- Adhesive cementation of root posts
- Adhesive cementation of indirect, metal-free translucent restorations with dual- or self-curing luting composites
- Direct restorations and core build-ups with dual- or self-curing composites

Advantages:

- Patented initiator-coated applicator brush
- Time-saving: one step, one coat
- No light-curing necessary
- High bonding values on enamel and dentin
- Single-dose presentation with applicators in two different sizes: Regular and Small / Endo
- Storage at room temperature

Delivery form

Refill		
Regular	20 x 0.1 g	634669
Regular	50 x 0.1 g	630378
Small/Endo	20 x 0.1 g	634668
Small/Endo	50 x 0.1 g	630380

Syntac®

Syntac® is the classic adhesive system for a chemically sound bond between the composite materials and the tooth structure.

Indications:

- Direct composite and compomer restorations in the anterior and posterior region
- Adhesive cementation of indirect restorations made of composite or ceramic

Advantages:

- For direct and indirect restorations
- Clinically proven for many years
- Reduction of post-operative sensitivity
- Excellent instant bond between dentin/enamel and composite
- High bond strength
- Storage at room temperature

Delivery form

Assortment	2 x 3 g / 1 x 6 g	532891
Syntac Primer, Syntac Adhesive, Heliobond, var. accessories		
Refill Primer	1 x 3 g	532893
Refill Adhesive	1 x 3 g	532892

Heliobond

Heliobond is a light-curing single-component bonding agent to optimize enamel etching with all light-curing restorative materials.

Indications:

- Adhesive for enamel bonding
- Together with Syntac also dentin bonding agent
- Cementation of tooth jewellery
- Transparent sealing of fissures and restorations
- As a bonding layer for the repair of composite, crown and bridge restorations

Advantages:

- For an optimum marginal seal between tooth and composite. Applied in conjunction with the enamel-etch technique
- Storage at room temperature

Delivery form

Refill	1 x 11 g	532906
Refill	1 x 6 g	532907

Total Etch

Total Etch is a 37% phosphoric acid gel.

Indications:

- Partial etching technique for adhesive restorations
- Total-etch technique for adhesive restorations
- Fissure sealings
- Cementation of brackets and tooth jewellery
- Adhesive cementation

Advantages:

- The conventional etching gel with balanced handling properties
- Strong contrast to the tooth
- Pre-bent metal cannulas for accurate application
- Jumbo delivery form to keep adequate amounts of gel in stock

Delivery form

Assortment Total Etch Jumbo	1 x 30 g / 2 x 2 g	558530
Total Etch Jumbo, Total Etch, var. accessories		
Refill	2 x 2 g	550588

Email Preparator blue

37% phosphoric acid in a liquid delivery form.

Indications:

- Enamel etching and dentin conditioning for sealants, composite restorations, and for the adhesive cementation of restorations.

Advantages:

- Micro-interlocking of Heliobond bonding agent with the etched enamel
- The material flows well into the fissures due to the low viscosity
- Reliable retention of the sealant, composite, and the seated restoration

Delivery form

Refill	1 x 6 g	533034
---------------	----------------	---------------

Amalcap® Plus

Non-gamma-2 silver amalgam alloy with spherical / irregular particles in self-activating capsules.

The alloy is composed of: Ag 70.1%, Sn 18.0%, Cu 11.9%

Indications:

- For restorations of molars and premolars

Advantages:

- High-silver amalgam without gamma-2-phase
 - High corrosion resistance and edge strength
 - Self-activating system with automatic activation during mixing in the Silamat.
- Two working times:
 ~ 3 min = fast
 ~ 4 min = regular

Delivery form

Refill	50 units
Regular size 1	532287
Regular size 2	532288
Regular size 3	532289
Fast size 1	532281
Fast size 2	532282

Vivacap®

Non-gamma-2 silver amalgam alloy with spherical / irregular particles in self-activating capsules.

The alloy is composed of: Ag 46.5%, Sn 30%, Cu 23.5%

Indications:

- For restorations of molars and premolars

Advantages:

- High-resistance amalgam restorations without gamma-2-phase
- Good carving and modelling properties
- Carving time of approx. 4 minutes
- Durable restorations with glossy surfaces
- Tight marginal seal
- Slight setting expansion enhances marginal adaptation

Delivery form

Refill	50 units
Size 1	532321
Size 2	532322
Size 3	532323

* IPS Empress®

IPS Empress® ceramic material has been known and established for processing in the laboratory for 20 years. Since the introduction of IPS Empress CAD, esthetic restorations may also be fabricated in the dental office by means of CAD/CAM. Moreover, the IPS Empress family is supplemented by a composite for direct restorative therapy: IPS Empress Direct (see under Composites).

IPS Empress CAD blocks are suitable for the fabrication of all-ceramic inlays, onlays, veneers, and crowns by means of CAD/CAM. They are available in two levels of translucency (high translucency and low translucency) as well as a polychromatic IPS Empress CAD Multi Block.

IPS Empress CAD restorations are finally either only polished or stained and glazed, and adhesively cemented.

IPS Empress® CAD HT

The IPS Empress® CAD HT blocks exhibit a higher translucency and lower brightness value than the LT blocks. They are ideally suitable for fabricating inlays and onlays because of their exceptional chameleon effect. The high translucency of the material and its life-like fluorescence allow the restoration to blend in seamlessly with the surrounding dentition.

Delivery form

IPS Empress® CAD for CEREC® and inLab® HT		
Refill HT Blocks – Chromascop	5 each	See p. 36
(4 sizes / 3 Chromascop shades)		
Refill HT Blocks – A–D	5 each	See p. 36
(4 sizes / 9 A – D shades)		

IPS Empress® CAD LT

The IPS Empress CAD LT blocks are characterized by their high level of brightness and true-to-nature chroma. Therefore, they are particularly suitable for fabricating larger restorations. The specially adjusted brightness of the material prevents "greying" of full and partial restorations. The blocks demonstrate a natural-looking fluorescence, which matches the different indications. Therefore, the restorations seamlessly blend into the remaining dentition under different light conditions.

Delivery form

IPS Empress® CAD for CEREC® and inLab® LT		
Refill LT Blocks – Chromascop	5 each	See p. 36
(4 sizes / 3 Chromascop shades)

Refill LT Blocks – Bleach	5 each	See p. 36
(3 sizes / 4 Bleach shades)		

IPS Empress® CAD Multi

The polychromatic IPS Empress® CAD Multi blocks offer a smooth colour transition between the dentin and incisal areas. They produce highly esthetic and natural-looking results, even without characterization. IPS Empress CAD Multi blocks feature a high level of chroma and lifelike opacity in the cervical areas and the desired level of translucency in the incisal region.

Delivery form

IPS Empress® Universal Glaze

Glaze paste to glaze all IPS Empress® CAD restorations. The liquid is used to adjust the consistency of:
IPS Empress Universal Shade,
IPS Empress Universal Stains and
IPS Empress Universal Glaze.

Delivery form

IPS Empress® Universal Glaze	1 x 3 g	562495
IPS Empress® Universal Glaze and Stain Liquid	1 x 15 ml	562496

IPS Empress® Universal Glaze Spray

For the easy and fast glazing of fully anatomical (characterized) IPS Empress® restorations (Esthetic and CAD). The Glaze Spray is also used to glaze veneered restorations (IPS Empress Esthetic Veneer).

Delivery form

IPS Empress® Universal Glaze Spray	1 x 120 ml	609432AN
------------------------------------	------------	----------

For the cut-back technique (incisal layering of IPS Empress CAD anterior crowns / veneers), the IPS Empress Esthetic layering material is available. It covers various layering materials and liquids. (See Product Catalog technical for detailed product description).

IPS Empress® Add-On 770 °C / 1418 °F

Low-fusing add-on material for subsequent adjustments, such as proximal and occlusal contacts for:

- IPS Empress® Esthetic restorations
- IPS Empress layering technique restorations

Delivery form

IPS Empress® Add-On 770 °C / 1418 °F	1 x 20 g	564080
--------------------------------------	----------	--------

IPS Empress® Esthetic Veneer Build-Up Liquid

This liquid is used to mix the IPS Empress® Esthetic Veneer layering materials IPS Empress Add-On 770 °C / 1418 °F.

Delivery form

IPS Empress® Esthetic Veneer Build-Up Liquid	1 x 60 ml	579405

* IPS e.max® CAD

IPS e.max® CAD is a high-strength lithium disilicate glass-ceramic (LS₂) for the CAD/CAM technique directly in the dental office (chairside) or the laboratory (labside).

The IPS e.max CAD blocks for chairside processing are available in 16 A-D and four modern Bleach BL shades. They are available in two levels of translucency and two sizes. There are also an even more opaque blocks for the fabrication of frameworks (layering technique) in the laboratory.

The IPS e.max CAD blocks with high translucency (HT) are used for the milling of minimally-invasive, fully anatomical restorations, such as inlays, onlays, veneers. For partial crowns and crowns, the less translucent (LT) blocks are used.

The restorations are directly milled from the blue blocks. During a quick combined crystallization/glaze firing cycle, which supersedes polishing, the restorations acquire their high strength (360 MPa) and the desired esthetic properties (tooth shade, translucency, brightness). The restorations can be additionally individualized using the Stain materials.

Finally, the restorations are seated. As an alternative to being placed using the adhesive cementation technique, crowns may also be cemented self-adhesively or conventionally.

IPS e.max® CAD for CEREC® and inLab®

For the efficient fabrication of full-contour restorations (Monolithic Solutions) with maximum strength and toughness. The Blocks are available in A–D and Bleach shades and can be processed in the CEREC® or inLab® System from Sirona. They are optimally suitable for the monolithic fabrication of inlays, onlays, veneers, crowns and 3-unit bridges. Should esthetic characterizations be necessary, they can be achieved with the staining or cut-back technique.

Abutment Solutions: MO A 14, LT A 14 and LT A 16 blocks

They are suitable for the CAD/CAM fabrication of implant-retained hybrid restorations on single teeth. The blocks are equipped with a prefabricated interface (diameter S and L) for the Sirona Ti Base. The IPS e.max® CAD A14 Blocks in 5 MO (Medium Opacity) shades are used for highly esthetic hybrid abutments, while the IPS e.max CAD A16 Blocks in 10 LT (Low Translucency) shades are suitable for highly efficient hybrid abutment crowns. These hybrid restorations are individually fabricated of lithium disilicate (LS₂) blocks and cemented onto the titanium base.

IPS e.max® CAD Crystall./Glaze Paste

Special glaze paste to be used with fully anatomical IPS e.max CAD restorations. It may be applied either prior to crystallization on the "blue" crown or in the subsequent firing cycle.

Delivery form

IPS e.max CAD Crystall./Glaze Paste	1 x 3 g	605363
IPS e.max CAD Crystall./Glaze Paste FLUO	1 x 3 g	674676

IPS e.max® CAD Crystall./ Glaze Spray

Glaze spray to be used with fully anatomical IPS e.max® CAD restorations. It is sprayed on the restorations once IPS e.max CAD Crystall./Shades and Stains have been applied. Subsequently, the restorations are fired in a combined crystallization and glaze firing cycle.

Delivery form

IPS e.max® CAD Crystall./Glaze Spray	120 ml	605364
--------------------------------------	--------	--------

IPS e.max® CAD Crystall./ Glaze Liquid

Special liquid to dilute IPS e.max® CAD Crystall./Shades and Stains and the IPS e.max CAD Crystall./Glaze Paste.

Delivery form

IPS e.max® CAD Crystall./Glaze Liquid	1 x 15 ml	605366
---------------------------------------	-----------	--------

IPS e.max® CAD Crystall./ Add-On, Liquid

For adjustments, such as in incisal/occlusal or dentin areas. These adjustments can be made directly with the crystallization firing or in a subsequent corrective firing cycle.

Delivery form

IPS e.max® CAD Crystall./Add-On Dentin	1 x 5 g	635549
IPS e.max® CAD Crystall./Add-On Incisal	1 x 5 g	605365
IPS e.max® CAD Crystall./Add-On Liquid allround	1 x 15 ml	605569

IPS e.max® CAD Crystallization Tray

IPS e.max CAD Crystallization Tray is a firing tray suitable for the crystallization of IPS e.max CAD restorations and IPS e.max CAD Crystall./Stains and Glaze firing of IPS e.max ZirCAD restorations.

Delivery form

IPS e.max® CAD Crystallization Tray		605367AN
IPS e.max CAD Crystallization Tray	1 x	
IPS e.max CAD Crystallization Pin (sizes: S, M, L)	9 x	

IPS e.max® CAD Speed Crystallization Tray

IPS e.max CAD Speed Crystallization Tray is a special firing tray suitable for the speed crystallization of IPS e.max CAD restorations and IPS e.max CAD Crystall./Stains and Glaze firing of IPS e.max ZirCAD restorations.

Delivery form

IPS e.max® CAD Speed Crystallization Tray		647633AN
IPS e.max CAD Speed Crystallization Tray	1 x	
IPS e.max CAD Speed Crystallization Pin	3 x	

IPS e.max® CAD Crystallization Pins

The pins assist users in positioning the restorations on the IPS e.max CAD Crystallization or IPS e.max CAD Speed Crystallization Tray.

Delivery form

IPS e.max® CAD Crystallization Pin Refill		
S / M / L	6 x each	605368AN
XS	3 x	656105

IPS e.max® Press / IPS e.max® CAD Shade Guides

The shade guides for press and CAD materials are supporting tools for determining the shade. To prevent cross-contamination in the oral cavity, the individual tabs and the entire shade guide are auto-clavable. The shade tabs show the final shade, i.e. after pressing or crystallization. They thus help to check the shade, and they can also be used to check the quality of the crystallization process of IPS e.max® CAD restorations.

Delivery form

All-Ceramic Preparation Guide

The three-dimensional preparation guide from Ivoclar Vivadent visualizes the proper preparation of teeth for all-ceramic restorations. The model furthermore shows the minimum preparation requirements and the indications of IPS Empress and IPS e.max restorations. The model comes with an illustrated booklet which features the preparation recommendations. The booklet is also available separately.

Delivery form

All-Ceramic Preparation Guide Edition II (model)	630548
All-Ceramic Recommendations for Preparation (D/E)	631797

IPS e.max® ZirCAD LT for CEREC®

IPS e.max ZirCAD LT are preshaded monochromatic zirconium oxide blocks suitable for dental practices. They are indicated for full-contour crowns and three-unit bridges. The material's high strength (1,200 MPa*) allows for thin restoration walls (0.6 mm) and thus for tooth-structure preserving preparations. After wet or dry processing, sintering is conducted in e.g. Programat® CS4. The fluorescent IPS e.max CAD Crystall./Glaze Paste Fluo is available for glazing. Optional characterization is possible with IPS e.max CAD Crystall./Shades and Stains. IPS e.max ZirCAD restorations can be cemented conventionally (e.g. with SpeedCEM® Plus)

* Mean biaxial flexural strength. Source: R&D Ivoclar Vivadent, Schaan, Liechtenstein

Telio®

Everything (for) provisionals

Telio CS . Telio CAD . Telio LAB

Telio enables dentists (Telio CS), CAD/CAM users (Telio CAD) and dental technicians (Telio Lab) to take advantage of a comprehensive, fully integrated product system.

- One product solution for conventional and implant-borne temporary restorations.
- All materials and shades are compatible with each other
- Suitable for a vast range of applications

Telio: A system for every type of temporary restoration. See for yourself.

Telio® CS C&B

Self-curing composite material in paste form for the fabrication of temporary restorations.

Indications:

Fabrication of temporary restorations

- Crowns and bridges
- Inlays and onlays
- Core build-ups in combination with temporary posts
- Veneers

Advantages:

- High fracture strength and optimum wear period
- Accuracy of fit and tension-free results
- Protection of the dental pulp and tissues
- Easy handling due to automix double-barrel cartridge

Shades:

Bleach BL3, A1, A2, A3, A3.5

Telio® CS Link

Dual-curing, translucent, temporary composite cement for the esthetic and provisional cementation of temporary restorations.

Indications:

Temporary cementation of provisionals

- Crowns and bridges
- Inlays and onlays
- Veneers

Advantages:

- Eugenol-free
- Dual-curing
- High esthetics due to two translucent shades
- Ideal retention behaviour
- Easy handling due to automix double-push syringe

Shades:

A3 and Transparent

Telio® CS Cem Implant

Self-curing resin cement with light-curing option designed for the esthetic, reversible/semi-permanent cementation of restorations on implant abutments.

Indication:

- Reversible/semi-permanent cementation of implant superstructures on abutments made of titanium, gold and zirconium oxide.

Advantages:

- Reversible/semi-permanent cementation of temporary and permanent restorations
- Wear period: 6 months and more

Delivery form

Refill Telio® CS Cem Implant	1 x 6 g

Telio® CS Desensitizer

A clear solution for application onto dentin for reducing and preventing dentinal hypersensitivity and post-operative sensitivity.

Indications:

Prevention and reduction of dentinal hypersensitivity and post-operative sensitivity for the following fields of application:

- Temporary restorations
- Luting / cementation of indirect restorations
- Direct restorative treatment

Advantages:

- Total working time of 10 seconds. No light-curing required
- License for treatment planning and material selection.
No interaction with the materials used in the further treatment steps.
- Reduction of dentinal hypersensitivity and post-operative sensitivities
- Cleaning of cut dentin surfaces

Telio® CS Inlay

Telio® CS Inlay is a light-curing, single-component temporary restorative material.

Indications:

- Deep inlay preparations with parallel walls
- Reversible obturation of screw access holes in implant superstructures
- Relining of prefabricated temporary crowns made of polycarbonate or methacrylate

Advantages:

- Seals tooth cavities effectively and shows no discolouration
- Demonstrates low polymerization shrinkage
- Quick and easy application, removal in one piece
- Light-curing, single-component material
- Bonds to the tooth but does not stick to the instrument
- No additional temporary cement or adhesive required
- Available in two different shades and presentations (syringes and Cavifils)

Shades:

Transparent and Universal

Telio® CS Onlay

Telio® CS Onlay is a light-curing, single-component temporary restorative material.

Indications:

- Wide, shallow cavities with few retentive areas, such as onlay preparations

Advantages:

- Seals tooth cavities effectively and shows no discolouration
- Demonstrates low polymerization shrinkage
- Quick and easy application, removal in one piece
- Light-curing, single-component material
- Bonds to the tooth but does not stick to the instrument
- No additional temporary cement or adhesive required
- Available in two different shades and presentations (syringes and Cavifils)

Variolink® Esthetic

Variolink® Esthetic is an esthetic light- and dual-curing luting composite for the permanent cementation of demanding ceramic and composite restorations.

Indications:

Variolink Esthetic LC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite restorations (inlays, onlays and veneers).
- Only use Variolink Esthetic LC for restorations with a low thickness of <2 mm that have sufficient translucency (e.g. IPS e.max® HT).

Variolink Esthetic DC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite restorations (inlays, onlays, partial crowns, crowns, bridges)
- Restorations made of opaque ceramics, e.g. oxide ceramics can only be permanently cemented if an adhesive is additionally used that is separately light-cured.

Advantages:

- Straightforward Effect shade system
- Excellent shade stability thanks to the amine-free formulation
- Easy excess removal
- Flexible, situational consistency – ideal combination of flowability and stability
- Ideal bonding with Adhese® Universal
- Reliable bonding to the restoration with Monobond® Plus

Shades:

Light+, Light, Neutral, Warm, Warm+

Multilink® Automix

The adhesive cementation system

A strong
bond,
proven performance.

Now with advanced formula

Strong hold – both dual and self-curing

Universal – suitable for silicate and oxide ceramics as well as metal

Clinically proven – numerous long-term studies

New – additional shade, improved handling

Clinically proven with
IPS e.max®

**ivoclar
vivadent®**
passion vision innovation

Multilink® Automix

Multilink Automix is an adhesive luting system for the cementation of indirect restorations made of silicate and oxide ceramics (e.g. IPS e.max®), metal, metal-ceramics as well as composites.

New: Optimized formula, additional “white” shade, try-in pastes and optimized handling

Indications:

Cementation of indirect restorations (inlays, onlays, crowns, bridges, endodontic posts) made of:

- Metal and metal-ceramics (PFM)
- All-ceramics (silicate)
- Reinforced all-ceramics (zirconium and aluminium oxide)
- Composites and fibre-reinforced composites (FRC)

Advantages:

- Strong hold – dual- as well as self-curing
- Universal – cementation of silicate and oxide ceramics as well as metal
- Clinically proven – many long-term studies
- Optimum removal of excess material
- Optimum esthetics
- Optimum marginal quality

Shades:

Transparent, yellow, white, opaque

Multilink® Hybrid Abutment

Multilink® Hybrid Abutment is a self-curing luting composite for the permanent cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Indication:

Extraoral cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures (abutment and abutment crowns) on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Advantages:

- High bonding strength for a reliable cementation
- Two levels of opacity for optimum esthetics
- Easy handling with the practical Automix syringe

SpeedCEM® Plus

Self-adhesive resin cement

A BIG PLUS FOR ZIRCONIA

THE PLUS FACTORS:

- + **Excellent self-cure performance** ideal for zirconia and metal-ceramics
- + **User-friendly** handling and easy clean-up
- + **Efficient process** with just one component

ivoclar
vivadent®
passion vision innovation

SpeedCEM® Plus

SpeedCEM® Plus is a self-adhesive, self-curing resin cement with optional light-curing. The material offers an ideal combination of performance and user-friendliness. Its formulation has been optimized to make it particularly suitable for use in conjunction with restorations made of zirconium oxide and metal-ceramics and for the cementation of restorations on implant abutments.

SpeedCEM Plus is suited for the permanent seating of crowns and bridges on natural teeth and on implant abutments that are made of the following restorative materials:

- Oxide ceramics such as zirconium oxide, e.g. IPS e.max® ZirCAD
- Metal and metal-based restorations
- Lithium disilicate glass-ceramics, e.g. IPS e.max®

Advantages:

- Excellent self-cure performance
- User-friendly handling
- Easy clean-up
- Tolerant processing
- High radiopacity
- Efficient process

Vivaglass® CEM PL

Self-curing glass ionomer cement with high translucency.

Indications:

- Cementation of full-cast crowns or veneers, high-strength all-ceramic materials and orthodontic bands.

Advantages:

- High translucency
- 1:1 mixing ratio
- Convenient tube
- Radiopacity
- Strong bond to dentin
- Optimum wetting of powder and liquid
- Easy removal of excess material

Monobond Etch & Prime®

Monobond Etch & Prime® is a single-component ceramic primer that allows **glass-ceramic surfaces** to be etched and silanated in one easy step.

Indications:

- Conditioning of glass-ceramic surfaces for the adhesive bond with luting composites

Advantages:

- Eliminates the unpopular etching of the glass-ceramic surface with hydrofluoric acid
- The glass-ceramic is etched and conditioned in one step
- A reliable bond to the adhesive is established

Delivery form

Monobond Etch & Prime Refill	1 x 5 g	673026WW
------------------------------	---------	----------

Monobond® Plus

Universal, single-component bonding agent for **all** indirect restorative materials.

Indications:

Universal, single-component bonding agent for all indirect restorative materials (glass and oxide ceramics, metal, composite, fibre-reinforced composite). It generates a sound bond between the restoration and the cementation material.

Delivery form

Refill	1 x 5 g	626221
--------	---------	--------

Ivoclean®

Universal cleaning paste especially designed for removing contaminants, in particular those containing proteins, from restoration surfaces after intraoral try-in.

Indication:

- Extraoral cleaning of pre-treated ceramic and metal restoration surfaces

Delivery form

Refill	1 x 5 g	637568
--------	---------	--------

Liquid Strip

Glycerine gel to prevent the oxygen-inhibited layer of composites with composite or ceramic restorations.

Indications:

- Try-in paste
- Preventing an inhibited layer with composites
- Protecting the etching pattern of lab-fabricated all-ceramic restorations

Delivery form

Refill	1 x 2.5 g	532505
--------	-----------	--------

Heliosit® Orthodontic

Light-curing, highly transparent single-component luting material for brackets.

Advantages:

- No dosing, no mixing
- Brackets can be placed on the tooth surfaces without time pressure due to the light-curing properties of the material

Delivery form

Refill	3 x 2.5 g	532629
--------	-----------	--------

Ceramic Repair

Comprehensive system for intraoral repairs of ceramic and composite restorations.

Indications:

Repair of fractures in:

- Ceramic-veneered restorations
- All-ceramic restorations
- Composite restorations

Advantages:

- Comprehensive system
- Clinically proven materials
- Well-structured processing procedure

ApexCal®

ApexCal® is the new, creamy calcium hydroxide paste suitable for use as a temporary disinfectant dressing during endodontic treatment.

Direct application of ApexCal with a tip

Application of ApexCal with a lentulo spiral

Rinsing out of the temporary ApexCal dressing

Indications:

- Applied as a drug filler during root canal treatment and used for indirect and direct pulp capping

Advantages:

- Time-saving direct application
- Easy removal, as the material does not set when in place
- High radiopacity (400% AI)

Delivery form

Refill		595915
Syringes ApexCal	2 x 2.5 g

Apexit® Plus

Calcium hydroxide root canal sealer for the permanent obturation of root canals.

Initial situation

Direct application of Apexit Plus using an Intra Canal Tip

Application of Apexit Plus using a lentulo spiral

Insertion of the gutta percha points

Condensation of the gutta percha points using a spreader

Obturated root canal

Indications:

- Permanent obturation of root canals in conjunction with all obturation techniques involving gutta-percha

Advantages:

- Excellent tissue tolerance
- Durable sealing of the root canal due to the slight setting expansion
- Its easy flowing composition allows the material to adapt well even to morphologically complicated canals
- Convenient application (automix syringe and Intra Canal Tip enable easy direct application)
- Long working time (mixed Apexit Plus can be used over 3 hours at room temperature)

FRC Postec® Plus

FRC Postec® Plus is a highly esthetic and highly radiopaque root canal post composed of glass fibre-reinforced composite. The post is suitable for the chairside reconstruction of endodontically treated teeth that show extensive coronal damage.

The FRC Postec Plus system consists of light-transmitting glass fibre-reinforced composite posts in three sizes and includes purpose-designed stainless steel reamers for the preparation of the recipient site of the post space.

Prepare the post space

Cement the post with Multilink

Build up the core with MultiCore Flow

Completed core build-up

Indications:

- Restoration of endodontically treated anterior and posterior teeth that demonstrate severe coronal damage

Advantages:

- Lifelike appearance
- Superior radiopacity
- High retention
- Gentle on roots
- Clearly arranged system using tried-and-tested products
- Easy to remove
- Clinically proven concept

MultiCore® Flow

Self-curing composite core build-up material with light curing option. Two curing methods and four shades provide an optimum foundation for the reconstruction of vital and non-vital teeth with part or most of the clinical crown missing.

Automix syringe, 10 g

Cartridge, 50 g

Indications:

- Core build-up of vital and non-vital teeth

Advantages:

- Based on Ivoclar Vivadent's long-term experience in the field of composite technology
- A suitable option for every case: Self- or light-curing
- Four different shades
- Coordinated system with the self-etching AdheSE

Shades:

Virtual®

Virtual® is the new line of vinylpolysiloxane impression materials specifically developed to meet the requirements of today's most popular impression taking techniques.

The system features the five viscosities Putty, Heavy Body, Monophase, Light Body and Extra Light Body in both "fast" (2:30 min.) and "regular" (4:30 min.) setting times.

The system is complemented by a full line of accessories, including a tray adhesive.

Indications:

- Final impressions used for the fabrication of indirect restorations (crowns, bridges, inlays, onlays and veneers)
- Dental implant impressions
- Matrix for "wax-ups" and treatment planning, study models
- Edentulous impressions
- Matrix used to create temporary restorations

Advantages:

- Excellent adaptation to the moist oral hard and soft tissues
- Excellent moisture displacement
- Exceptional readability and precision
- Flexible working times and fast setting phase
- Fresh peppermint scent
- Outstanding balance of physical properties

Shades:

- Sea blue: Virtual Putty, Virtual Heavy Body and Virtual Monophase
Caramel: Virtual Light Body and Virtual Extra Light Body

Virtual® 380

The two consistencies Heavy Body and Monophase are now offered as Virtual® 380 in new, large cartridges.

These XXL cartridges are suitable for use in e.g. Pentamix, Plug & Press Dispenser and MixStar mixing units.

Advantages:

- Ready-to-use, large cartridge - convenient handling
- Separate activation as in the case of foil bags is not required
- Economical package size - contents 380ml

Delivery form

Multi Pack	6 x 380 ml each + Mixer + Bayonet Ring

Virtual® CADbite Registration

Virtual® CADbite registration material is scannable and can be used for the optical recording of data when fabricating restorations with CAD/CAM systems such as CEREC. Virtual CADbite is an addition silicone, which may also be used for „conventional“ bite registration techniques in conjunction with indirect restorative procedures. The material demonstrates a non-slump consistency, short setting time and good dimensional stability. Moreover, it provides excellent reproduction of detail and achieves a final hardness of 32 Shore D.

Bite registration with Virtual CADbite in situ

Scanned bite record

Advantages:

Fast

As the material requires an intra-oral set time of only 45 seconds, the risk of distortions and inaccuracies due to patient jaw movements are substantially reduced. At the same time, Virtual CADbite provides sufficient working time to allow full-arch bite registrations to be taken.

Strong

Due to the material's high final hardness of 32 Shore-D and high fracture toughness, Virtual CADbite registrations are easy to trim and grind. Moreover, undesirable shifts are prevented when adjusting the position of the casts in the articulator.

Scannable

In response to the needs of CAD/CAM users across the globe, Virtual CADbite has been given a reflective surface. It delivers excellent results when capturing images with intra-oral scanning devices.

passion vision innovation

Bluephase® – LED for every use and comfortable to fit every hand

In contrast to LED devices of the second generation, the Polywave® LED lights achieve an optimal broadband range from 385 to 515 nm, which is similar to the spectrum of halogen lights, which served as their model. The Bluephase curing lights are therefore capable of polymerizing all current photoinitiators and materials used in dentistry.

Wavelength range

Every material due to Polywave® LED

Bluephase is suitable for all light-curing materials because it is based on Polywave LED technology, which uses different LEDs with dominant wavelengths of approx. 410 nm and 470 nm.

- Photoinitiator: camphorquinone
- Photoinitiator Acyl Phosphine Oxide, e.g. Lucirin TPO
- Bluephase Style with Polywave LED²
- Elipar S10^{*1}
- SmartLite PS^{*1}
- Demi Plus^{*1}

Source: R. Price, Dalhousie University Halifax, 2011

This is how it works: Turn around charging base, remove power cord, attach to handpiece, resume work as usual.

Bluephase Style is comfortable to hold in any position.

Every indication due to continuous cooling

Annoying interruptions and irritating waiting times are a thing of the past. The lights of the Bluephase range allow continuous operation without any clinical limitations – even when extensive indirect restorations are placed.

Every time due to Click & Cure

Cordless operation ensures maximum mobility in the dental practice. The proven Click & Cure function enables you to avoid irritating waiting times in case the battery has run out. With just one click you can connect the handpiece to the power cord of the charging base.

Every hand – comfortable to hold for men and women

Bluephase Style can be held in the hand in a position that is comfortable and free of strain to suit your preferences. The strain exerted on your arm and hand is very low – regardless of the size of your hand.

* These trade names are not registered trademarks of Ivoclar Vivadent AG.

¹ LED light of the 2nd generation

² LED light of the 3rd generation

Bluephase® Style – on an ergonomic mission

Bluephase® Style is a cordless LED curing light that offers a high light intensity (**new at 1,200 mW/cm²**). Given its compact shape, it comfortably fits the hands of women and men.

Indication:

Curing light for the polymerization of all dental materials in the wavelength range of 385 to 515 nm.

Advantages:

- Ergonomic shape to fit the hands of men and women
- polywave® LED with a broad light spectrum ranging from 385 to 515 nm, suitable for all materials
- Fanless construction for continuous operation without clinical limitations
- Click & Cure for battery-independent emergency corded operation
- Cordless design ensuring the ultimate in mobility
- High light intensity of 1,200 mW/cm² for reduced curing times starting from 10 seconds
- Easy operation due to intuitive 2-button operation
- Large treatment field due to 10-mm light guide
- Shortened light guide: all tooth surfaces can be easily reached, eliminating the need for extreme opening of the mouth
- Inductive charger enabling contactless charging of battery
- Base station with battery charge indicator for easy checking of battery charge levels from a large distance
- High capacity lithium polymer battery allowing 20 minutes of continuous operation
- Closed construction of the housing for optimum practice hygiene
- Easy cleaning of the charging base due to discharge opening
- Innovative movement sensor ensuring immediate readiness for operation
- 3-year warranty (battery 1 year)
- Available in three shades (grey, blue, pink and **now also in green**)

Bluephase® Style 20i – on a maximum mission

Bluephase® Style 20i is a high-performance curing light with a light intensity of 2,000 mW/cm² that combines **maximum light output with extremely short curing times of 5 s.**

Indication:

Light unit to polymerize all light-curing dental materials in a wavelength range of 385 – 515 nm.

Advantages:

- Up to 2,000 mW/cm² in the Turbo mode and therefore suitable for the polymerization of indirect restorations
- Extremely short curing times starting from only 5 seconds for time-saving and economic working procedures
- Polywave LED with a wavelength spectrum of 385 – 515 nm, suitable for curing all dental materials
- Four selectable exposure times and two selectable curing modes High Power (1,200 mW/cm²) and Turbo (2,000 mW/cm²) for all indications
- Cordless design for ultimate portability
- Easy operation due to intuitive two-button operation
- Shortened light guide enabling access to all tooth surfaces without extreme opening of the mouth
- Inductive charger enabling contactless charging of battery
- Charging base with battery charge indicator allows seeing the current charging status even from a great distance
- High-performance lithium polymer battery for 20 min operation in the High Power mode
- Seamless construction of the housing for optimum hygiene
- Charging base equipped with a discharge opening for easy hygienic cleaning procedures
- Innovative movement sensor for immediate operation
- 3-year warranty (1-year warranty for battery)

Delivery form

Bluephase® Style 20i 100 – 240 V	682109
Bluephase® Style 20i 100 – 240 V (incl. Bluephase® Meter II)	682108
Bluephase® Style 20i Battery	637692
Bluephase® Style 20i Handpiece (handpiece, battery, light guide)	682110

Bluephase® Style M8 – on an economical mission

Bluephase® Style M8 ist an economical, cordless LED curing light offering a light intensity of 800 mW/cm².

Indication:

Suitable for the polymerization of common light-curing dental materials in the wavelength range of 430–490 nm.

Advantages:

- An attractive price/performance ratio combined with proven Bluephase product quality
- Ergonomic, well balanced design for fatigue-proof operation
- High light intensity of 800 mW/cm² enabling reduced curing times starting from 15 seconds

- Shortened, 360° rotatable and autoclavable 10-mm light guide
- Cordless design for ultimate mobility in the dental office
- The handpiece is instantly ready-to-use upon touch given the innovative movement sensor
- Intuitive handling with 2-button operation
- Given the inductive charging of the battery, contaminated charging contacts are no longer an issue
- Charging base with blue pilot light to recognize the charging status from long distance
- Outlet in the charging base for easy and hygienic cleaning
- High-performance lithium polymer battery for an operating capacity of 30 minutes
- Closed housing construction for optimum hygiene
- 2-year warranty (battery 1 year)

Delivery form

Bluephase® Style M8 100 – 240 V	667505
Bluephase® Style M8 Battery	637692
Bluephase® Style M8 Handpiece (handpiece, battery, light guide)	667496

Bluephase® Meter II The dental radiometer

Bluephase® Meter II is a precise dental radiometer for the quick and easy verification of the light intensity of all types of curing lights.

Indication:

Enables exact and unrestricted verification of the light intensity in [mW/cm²] and the light output in [mW] of all curing lights in the wavelength range of 380–550 nm with an accuracy tolerance of ±10% as compared to the measurement with an integrating sphere.

Advantages:

- Innovative measuring principle offering a unprecedented measuring accuracy for dental radiometers
- Universally applicable for any curing light (halogen-, plasma-, LED-devices, etc.)
- Integrated template to determine the diameter of circular guides between 6–12 mm
- Additional program to determine the light output in milliwatt [mW] analogue to integrating sphere
- Digital display
- Ergonomic and modern design
- 3-year warranty

Silamat® S6

Form and function – perfectly mixed.

Indication:

- Modern universal mixer for amalgam, glass ionomer cements and other predosed dental materials in capsules and injection capsules

Advantages:

- Attractive design for the modern dental practice
- Thanks to its rounded shape and the removable cover the unit can be cleaned easily
- Tried-and-tested Silamat technology
- Above-average speed of 4500 rpm
- Special figure-eight pattern and patented mixing fork
- Compatible with all popular capsules and injection capsules in various shapes and sizes
- Three-year warranty
- Voltage 100–240 VAC

Delivery form

Silamat® S6	100 – 240 VAC	602286

Programat® CS2

The second generation of the Programat® CS series is the ideal ceramic and crystallization furnace for dentists. The furnace has been specially developed for the crystallization of IPS e.max® CAD restorations. The Programat CS2 is easily operated by means of the new colour touch screen and the proven membrane-sealed keypad. It is furthermore equipped with 20 individual programs as well as predefined Ivoclar Vivadent programs, such as the Speed program, which crystallizes IPS e.max CAD restorations in less than 15 minutes.

The new and modern operating concept and the QTK2 muffle technology are only two of the many new innovations featured in the Programat CS2. The QTK2 muffle technology is responsible for even more homogeneous heat distribution in the firing chamber, leading to optimum firing results and a prolonged life cycle of the heating element. Additionally, the new vacuum pump control system with double valve technology ensures noiseless and power-saving operation of the vacuum pump.

Technical Data:

- Voltage: 200 – 240 V / 50 – 60 Hz
110 – 120 V / 50 – 60 Hz
100 V / 50 – 60 Hz
- Dimensions of the closed furnace: Depth: 465 mm
Width = 305 / 410 mm (with cooling tray)
Height: 320 mm
Diameter: 90 mm, height: 80 mm
- Usable size of the firing chamber:
- Max. firing temperature: 1200 °C

Advantages:

- Colour touch screen and proven membrane-sealed keypad
- QTK2 muffle technology with SiC bottom reflector
- Easy operation; specially developed for use in the dental practice
- Automatic double-range temperature calibration (ATK2)
- Remote diagnostics via Internet, e-mail and data log files
- Software updates via USB flash drive
- Power-saving technology
- Optical Status Display (OSD)
- Modern and ergonomic design
- Modern interfaces (USB, Ethernet interface, SD card reader)
- Large cooling tray
- Integrated tong holder
- 20 individual firing programs
- Double valve vacuum technology
- Removable furnace head
- Power Fail Save System

* other voltage versions available

Programat® CS3

The Programat® CS3 is the ideal ceramic and crystallization furnace for dentists with high demands. It has been especially developed for the crystallization of IPS e.max® CAD restorations. The furnace is operated via the 7-inch colour touch screen with a specially developed operating concept for the dental practice and the well-proven membrane-sealed keypad. The Programat CS3 features over 30 individual programs and preset Ivoclar Vivadent programs, one of which is the Speed program which crystallizes IPS e.max CAD restorations in less than 15 minutes.

With the help of the patented Digital Shade Assistant (DSA) the selection of the tooth shade can be achieved instantly. The software compares the tooth to be analyzed with three pre-selected shade guide teeth in a picture. A special image processing software recognizes the tooth to be analyzed and the three shade guide teeth. The best matching tooth shade is displayed on the furnace screen as a result.

The proven QTK2 muffle technology ensures an even more homogenous heat distribution in the firing chamber. Optimal firing results are achieved and the life cycle of the heating element is prolonged. The new vacuum pump control system with double valve technology ensures noiseless and power-saving operation.

Technical Data:

- Voltage: 200 – 240 V / 50 – 60 Hz
110 – 120 V / 50 – 60 Hz
100 V / 50 – 60 Hz
- Dimensions of the closed furnace: Depth: 495 mm
Width: 320 mm / 395 mm (with cooling tray)
Height: 320 mm
- Usable size of the firing chamber: Diameter: 90 mm, height : 80 mm
- Max. firing temperature: 1200 °C

Advantages:

- Firing and crystallization furnace with integrated DSA function for the digital analysis of the tooth shade.
- Colour touch screen in combination with the proven membrane-sealed keypad.
- Operating concept specially developed for the dental practice.
- QTK2 muffle technology with SiC bottom reflector
- Automatic double-range calibration (ATK2)
- Remote diagnostics through the Internet via e-mail and data log files
- Integrated power-saving function (Power-Saving Technology)
- Optical Status Display (OSD)
- Modern, ergonomic design
- Software updates via USB flash drive
- Programat WLAN Kit for wireless data transfer (software updates, PrograBase X10)
- Modern interfaces (USB, ethernet, SD card reader)
- Large cooling tray
- Integrated tong holder for firing goods
- 30 individual firing programs

* UTS 3D Universal Transferbow System

This system permits skull/joint-related orientation of models into the Stratos articulators according to patients' individual data. The UTS 3D is adjustable according to the Frankfort Horizontal (FH), Campers Plane (CP), or Median Sagittal Plane (MSP). The flexible modular construction of the transferbow permits its use with most articulator systems currently on the market.

Advantages:

- 3D-registration joint for rapid and precise fixation, with only one tommy screw
- Solid, light carbon-fibre constructions for improved convenience
- Ear pieces can be exchanged and disinfected
- Exchangeable nosepad

Delivery form

UTS 3D		593710

* Gnathometer M Type 2

Intraoral registration device according to Prof Dr Böttger for the determination of occlusal positions of edentulous patients. Permits fast and easy control of occlusal positions by needle-point tracing.

Advantages:

- Functional impression and registration in one appointment
- Multiple use; can be disinfected
- Connector for the UTS 3D transfer bow

Delivery form

Gnathometer M Type 2 (complete)	1x	530484
---------------------------------	----	--------

* Can only be ordered from authorized dealers of Ivoclar Vivadent technical.

* Stratos® 100

The Stratos® 100 is a biofunctional average-value articulator for various simple dental reconstructions. Its ergonomic design with spacious column construction enables easy and efficient handling. The Stratos 100 is the ideal articulator to set up Ivoclar Vivadent teeth according to the Biofunctional Prosthetic System (BPS).

Advantages

- Centric locking catch
- Separable upper and lower frame
- Optimized joint mechanics with a protrusion path angle of 30° and a Bennett angle of 30° or 15°
- Compatible with split-cast systems
- Protrusion shift

Delivery form

Stratos® 100	576820
Stratos 100	1x
Incisal plate 0°	1x
Incisal indicator	1x
Base blocks retentive	1x
Plaster protective plate	1x

* Stratos® 200

The Stratos® 200 is a biofunctional articulator which is universally applicable due to its various options. Its ergonomic design with incline supports permits ample working space. Standard equipment contains additional 30° or 15° protrusion inserts for fixed or swivel axis, 30° Bennett inserts, and a 0° incisal plate, as well as an incline support holder.

Advantages:

- Centric locking catch
- Upper and lower frame can be separated easily and controllably
- Optimum joint mechanic with exchangeable Bennett/protrusion inserts
- Compatible with split-cast systems
- Side shift 0–1.5 mm
- Protrusion shift

Delivery form

Stratos® 200	536381
Stratos 200	1x
Protrusion inserts 30°	2x
Bennett inserts 30°	2x
Incisal plate 0°	1x
Incisal indicator	1x
Base blocks retentive	2x
Plaster protective plate	1x
Incline support holder	1x

* Stratos® 300

The Stratos® 300 is a biofunctional, individually adjustable articulator. All the joint angles can be continuously set without having to replace any elements. The Stratos 300 is suitable for demanding restorations for which the joint angles have to be individually set. Its ergonomic design with spacious column construction enables easy and efficient handling.

Advantages:

- Centric locking catch
- Separable upper and lower frame
- Optimized joint mechanics with continuously adjustable angles
 - Protrusion 0°–60°
 - Retrusion 35°
 - Bennett 0°–30°
 - Side shift 0–1.5 mm
 - Protrusion shift 0–4 mm
- Possibility of individual and average-value model orientation
- Compatible with split-cast systems

Delivery form

Stratos® 300	576821
Stratos 300	1x
Incisal plate 0°	1x
Incisal indicator	1x
Base blocks retentive	2x
Plaster protection plate	1x

* Can only be ordered from authorized dealers of Ivoclar Vivadent technical.

CRT® bacteria

For determining the mutans streptococci and lactobacilli count in saliva and plaque.

Advantages:

- Two-in-one: Determining the mutans streptococci and lactobacilli count
- High selectivity of the culture media
- Hygienically sealed agar surfaces
- Excellent scientific backup
- Quick and easy to conduct
- Basis for individual and targeted therapy

Delivery form

Intro Pack		553545
Dip CRT bacteria	3x	
Test Strips CRT buffer var. accessories	3x	
Refill CRT bacteria, var. accessories	6x	553543
Refill CRT Paraffin	6x	553546

* Cultura

Small incubator for incubation of yeast and bacterial cultures in the dental practice.

Technical Data:

- Operating voltage: 220–240 V/50 –60 Hz
100–120 V/50 –60 Hz
- Rated capacity: 30 W/0,2 A
- Temperature range for incubation: +30 °C bis +45 °C ± 1 °C

Delivery form

Cultura Incubator	220 – 240 V	533539
	100 – 120 V	538325

CRT® buffer

For determining the buffer capacity of saliva.

Advantages:

- Individually packed test strips
- Reliable results
- Quick and easy to conduct
- Results available after only five minutes

Delivery form

Refill CRT® buffer, var. accessories	6x	553544
---	-----------	---------------

Plaque Test

Fluorescent disclosing liquid to reveal bacterial biofilm on the surfaces of natural and restored teeth or implants.

Advantages:

- Fluorescent under any curing light
- Easy handling
- No inconvenient staining of tongue and mucous membranes

Delivery form

Refill	1 x 11 g	533299
--------	----------	--------

Proxylt®

The prophy paste system with defined Relative Dentin Abrasion values (RDA) enables professional cleaning and polishing of teeth, restorations and implants according to the individual needs of patients. The pastes contain xylitol, which inhibits the growth of the bacteria that cause caries.

Containing fluoride

Proxylt RDA 83, coarse
Proxylt RDA 36, medium
Proxylt RDA 7, fine

Fluoride-free

Proxylt RDA 36, medium

Advantages:

- Customized, gentle cleaning and polishing
- Scratch-free cleaning of sensitive surfaces using the fine Proxylt without pumice
- Smooth consistency, splatter-free formula
- Fresh peppermint taste

Delivery form

Refill		
RDA 7, fine	1 x 55 ml	579866
RDA 36, medium	1 x 55 ml	579867
RDA 83, coarse	1 x 55 ml	579868
RDA 36, medium fluoride-free	1 x 55 ml	633064

Cervitec® F

The protective varnish with 1,400 ppm fluoride, chlorhexidine and CPC (cetylpyridinium chloride) for fluoride application and germ control in one working step.

Recommended applications:

- Caries prevention in high-risk groups
- Fluoridation of dental enamel
- Remineralization of incipient lesions
- Protection of hypersensitive teeth
- Protection against bacterial activity

Advantages:

- Combined protection in high-risk cases
- Relatively high tolerance to moisture
- Mild taste
- Suitable for all age groups

Delivery form

Refill Tube, var. accessories	1 x 7 g	665502
	2 x 7 g	665503
Refill Single Dose, var. accessories	20 x 0.26 g	665504

Cervitec® Plus

Chlorhexidine-containing protective varnish with 1% chlorhexidine plus 1% thymol for the professional bacterial control in patients with high caries risk. Cervitec® Plus also offers intensive protection in order to maintain the quality of restorations.

Indications:

- Protection of exposed root surfaces
- Treatment of hypersensitive cervicals
- Reduction of bacterial activity on tooth surfaces

Advantages:

- Sealing of exposed dentinal tubules
- Targeted treatment of particularly susceptible areas
- Long-term availability of active ingredients
- Prevention of the side effects commonly associated with chlorhexidine
- Suitable for all age groups

Delivery form

Assortment Single Dose, var. accessories	20 x 0.25 g	602271
Assortment Tube, var. accessories	1 x 7 g	602273
Refill Tube, var. accessories	2 x 7 g	604661

Cervitec® Liquid

Alcohol-free antimicrobial mouth rinse containing 0.1% chlorhexidine and xylitol plus essential oil.

Recommended applications:

- As an intensive, temporary mouth rinse treatment
- To maintain the healthy condition of oral mucosa and gums as well as the dental supporting tissue
- Before and after implantological and periodontal interventions and dental and orthodontic surgery
- In the event of high caries risk
- In case of restricted oral hygiene ability
- To prevent halitosis

Advantages:

- Reduction of bacterial growth
- High level of compliance due to mild taste
- Suitable for patients who need to avoid alcohol

Delivery form

Bottle	1 x 100 ml	630260
	1 x 300 ml	630221

Cervitec® Gel

Oral care gel containing 0.2% chlorhexidine, 900 ppm fluoride, provitamin D-panthenol and xylitol.

Recommended applications:

- As a concomitant measure in the prevention of diseases of the gums, oral mucous membrane and the peri-implant tissue
- As a concomitant measure in the management of inflammatory diseases such as gingivitis, mucositis, denture stomatitis, periodontitis or peri-implantitis
- In the case of elevated bacteria counts

Advantages:

- Provitamin D-panthenol and xylitol moisturize and soothe the gums and mucous membrane
- Smooth consistency - easy dispersion
- Mild taste

Delivery form

Tube	1 x 50 g	683123
	1 x 20 g	683125
Denture cleaning set	1 x 20 g	681411

1 Tube, 1 storage container, var. accessories

special care of problem areas

with braces

with crowns and implants

with removable tooth replacements

Fluor Protector S

The protective fluoride varnish

Superior protection
against dental caries
and erosion

Fluor Protector S

Protective fluoride varnish for the desensitization of teeth and protection against dental caries and erosion.

Indications:

- Treatment of hypersensitive cervicals
- Build-up of acid resistance of dental enamel
- Long-term caries prevention
- Treatment of sensitivity after tooth whitening

Advantages:

- 7,700 ppm fluoride in a homogeneous solution
- Immediate fluoridation of enamel
- High-yielding fluoride depot
- Mild taste
- Suitable for all age groups

Delivery form

Refill Tube , var. accessories	1 x 7 g	639520
	3 x 7 g	639521
Refill Single Dose , var. accessories	20 x 0.26 g	639522

Fluor Protector

Protective varnish containing fluoride for desensitization and caries prophylaxis.

Indications:

- Closing of open dentin tubules
- Prevention of demineralization
- Stimulation of remineralization
- Remineralization of incipient caries

Advantages:

- 1,000 ppm fluoride in a homogeneous solution
- Highly esthetic
- Excellent adhesion
- Suitable for all age groups
- Comprehensive clinical documentation

Delivery form

Ampoules

Assortment , var. accessories	25 x 1 ml	533294

VivAmpoule

Assortment , var. accessories	20 x 0.4 ml	550578
Refill , var. accessories	40 x 0.4 ml	550579

Fluor Protector Gel

The special gel with calcium, phosphate and fluoride for intensive but gentle dental care.

Recommended applications:

- Special dental care to protect against caries, erosive wear and periodontal disease
- Sensitive teeth
- Exposed cervicals
- With acidic diets
- With dry mouth
- During orthodontic treatment
- After professional tooth cleaning
- During tooth whitening

Advantages:

- Calcium + 1450ppm fluoride + phosphate protect the teeth from acid attacks.
- Xylitol inhibits the growth of cariogenic bacteria.
- D-panthenol is soothing to the gums.

Delivery form

Tube	1 x 20 g	628437
	1 x 50 g	628436

Helioseal® Helioseal® F Helioseal® Clear

Light-curing, resin-based fissure sealants for the preventive sealing of pits and fissures, using the enamel etching technique.

Helioseal®

White-shaded sealant that permits easy control during application and at recalls.

Helioseal® F

White-shaded sealant with additional fluoride release

Helioseal® Clear

Transparent sealant for excellent esthetic results and easy monitoring of fissures in case of doubt

Advantages:

- Precise application, the basis for top quality sealing results
- Well-proven in many years of clinical use
- Effective protection against caries

Delivery form

VivaSens®

Desensitizing varnish for hypersensitive teeth.

Indications:

- Hypersensitive cervicals
- Hypersensitivities due to bleaching
- Desensitization after professional tooth cleaning, scaling and root planing
- Dentin protection under restorative materials

Advantages:

- Long-term relief
- Quick to work
- Quick to use
- Gentle to gums
- Free Stand Single Dose – free-standing with grip surface

VivaStyle®

The professional system for tooth whitening, featuring carbamide peroxide or hydrogen peroxide.
The professional solution for individual needs.

Advantages:

- In-office or at-home use
- Different concentrations of the active agent
- Application:
 - Gel with custom-made tray
 - Varnish system applied with a brush

VivaStyle® Paint On Plus

A varnish system with 6% hydrogen peroxide for in-office or at-home use. Direct application with a brush – no trays required.

Indications:

- Whitening of vital and non-vital teeth
- External

Advantages:

- Varnish system: for targeted use on the spot
- D-Panthenol: provitamin
- Whitening: after just seven days
- In the dental office: intensive treatment

Delivery form

Patient Kit	1 x 20 ml	602873

VivaStyle® 10%

VivaStyle® 16%

A gel containing either 10% or 16% carbamide peroxide for at-home treatment. It is applied with a customized tray.

Indications:

- Whitening of discoloured vital or non-vital teeth
- Internal and external

Advantages:

- Specially adjusted viscosity
- Calibrated, re-sealable syringe
- Soft and gentle tray material

Delivery form

OptraGate®

The **latex-free** OptraGate® lip and cheek retractor allows the treatment field to be enlarged effectively and comfortably. OptraGate retracts the lips and cheeks gently and evenly over a large area, allowing a more effective relative isolation of the treatment field. OptraGate is comfortable to wear as it is three-dimensionally flexible. The improved padding of the lip and cheek retractor as well as the recesses to accommodate the upper and lower lip frenulum increase the patient comfort – even during longer treatment sessions.

OptraGate in the two sizes Junior and Small is now available in two playful colours, blue and pink. The choice of colours is particularly interesting to children and adolescents and contributes to enhancing patient compliance.

(Ivoclar Vivadent AG, Liechtenstein)

Indication:

Suitable for use in diagnostic, preventive and therapeutic dental procedures (in particular restorative procedures, cavity preparation, professional tooth cleaning, diagnostic procedures, scaling and root planing, tooth whitening, impression taking).

Advantages:

- Efficient treatment and more effective relative isolation
- Enlarged treatment field and accessibility of the cavity
- Comfortable to wear for patients

Delivery form

OptraDam® Plus

OptraDam® Plus is an anatomically shaped rubber dam for the absolute isolation of the working field. It offers the clinician increased visibility and accessibility. In addition, the device facilitates the evacuation of water spray. OptraDam Plus provides patient comfort and assists in keeping the patient's mouth open due to its three-dimensional flexibility.

(Ivoclar Vivadent AG, Liechtenstein)

Indication:

Suitable for use in therapeutic dental procedures for which an absolutely dry and isolated working field is required (e.g. for adhesive cementation, filling therapy and root canal treatments).

Advantages:

- Easy application thanks to the integrated frame and pre-printed arch template
- High patient comfort thanks to the flexible, three-dimensional design
- Simultaneous isolation of both arches thanks to the tension-free placement

OptraSculpt® Next Generation

OptraSculpt Next Generation is a contouring instrument for the efficient contouring of composite restorations in the posterior region. The two-components attachments produced in a special procedure facilitate the modelling of smooth and esthetic high-quality filling surfaces. The attachment shapes specifically designed for the posterior region allow for a natural-looking recreation of anatomical tooth structures such as cusp slopes, fissures and proximal margins.

Indication:

Suitable for adapting, shaping and contouring uncured sculptable composite materials. Also suitable for lab composites.

Advantages:

- Three attachment shapes for the professional creation of sophisticated anatomical tooth structures
- Optimum working angle for the posterior region
- Hygienic dispenser box for easy access to attachments

OptraSculpt® Pad

OptraSculpt® Pad is a contouring instrument with special foam pad attachments designed for the efficient, non-stick forming and shaping of composites. The highly flexible synthetic foam pads optimally adjust to the anatomical contours and allow a smooth modelling, without leaving any unwanted marks on the composite restoration.

Reference scale on the instrument handle:

The continuous vertical lines show ideal average widths, the dotted vertical lines average axial inclinations of the maxillary anterior teeth.

Indication:

Suitable for adapting, shaping and contouring uncured sculptable composite materials. It is also available for lab composites.

Advantages:

- Anti-stick effect: reduced adhesion of the composite to the instrument
- Professional esthetics due to homogeneous surface design and reference scales on the instrument handle
- Reduced effort required for finishing and polishing

OptraSculpt®

Modelling instrument that facilitates working with composite materials. It consists of two high-quality basic instruments as well as special, slightly elastic modelling tips in six different shapes.

Indication:

Modelling of composite materials.

Advantages:

- Anti-stick effect: reduced adhesion of the composite to the instrument
- Six attachments for different indications
- Reduced effort required for finishing and polishing

OptraPol®

Efficient and advanced one-step polishing system with a high concentration of diamond particles. A high-gloss finish and smooth surfaces are achieved in only one working step. OptraPol® polishers can be autoclaved and re-used.

Shapes:

- Small flame
- Large flame
- Cup
- Lens

Indication:

OptraPol provides efficient high-gloss polishing results in just one step. It is indicated for the high gloss polishing of direct and indirect restorations made of all popular types of composite material as well as for amalgam restorations.

Advantages:

- One-step polishing system
- Radiant high-gloss restoration surfaces in only one step
- High wear resistance
- Autoclavable and reusable

OptraFine®

Highly efficient diamond polishing system, especially designed to meet the high esthetic requirements of ceramic polishing. Polishing instruments with a high content of diamond particles.

Shapes:

- Flame
- Cup
- Disc
- Nylon brushes and diamond polishing paste for high-gloss polishing

Indication:

High-gloss polishing of dental ceramic restorations

Advantages:

- Especially designed for ceramic materials
- Particularly smooth restoration surfaces
- High wear resistance
- Autoclavable and reusable
